

PRECISION Card Pro

Professional compact friction feed tabletop business card cutter with adjustable slitters, high productivity, and accuracy. Ideal solution for short-run production of full-bleed or no-bleed business cards.

A Ultrasonic Multi-Feed Detection

In the unlikely event that a double feed occurs, the ultrasonic multi-feed detection sensor stops the cutting operation and minimizes paper loss.

B Built-in Centering Laser Pointer

The centering laser pointer makes it easy to align paper accurately before cutting. This feature ensures the paper is positioned correctly during feeding, ensuring clean, accurate cuts every time. The laser pointer enhances precision and reduces setup errors.

C Highly Visible Top Cover

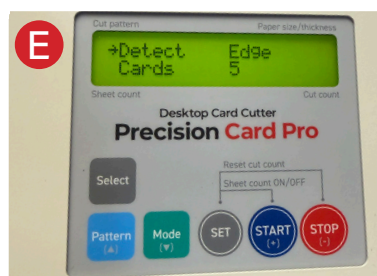

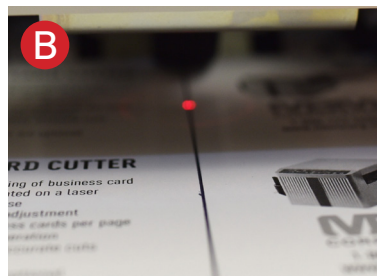

The transparent top cover provides a clear view of the paper feed, allowing you to easily monitor the feed status in real time. This added visibility offers greater peace of mind and ensures smoother operation.

D Transparent Viewing Window

The dust box features a clear window, allowing you to easily monitor scrap paper accumulation at a glance. This helps ensure timely maintenance and keeps your workspace clean and efficient.

E User Friendly LCD Control Panel

The control panel makes it easy for operators to use pre-programmed jobs and save up to 10 custom jobs.
